

BOOTH DESIGN

Besides the shell scheme booths, our preferred contractor offer design and construction of carpentry stands following your briefing and corporate image and applying their creativity and experience.

They follow the next steps in order to design and build your booth:

- Receive the briefing describing what type of booth you need
- Present a proposal in less than a 10days:
 - 3D images
 - Drawings (plans, sections, etc..)
- Once the project is accepted, they manage to build it in record time always maintaining the best quality construction. The set up is continuously supervised by a project manager.

Please contact them directly for a design and quote to expos@alleventshire.com
